RE: Notification of Nutritional Support Statements

To whom it may concern:

I hereby notify the Food and Drug Administration (FDA) of the use of statements of nutritional support in the labeling of AHCC® Plus, a dietary supplement. Source Naturals® is the manufacturer of AHCC® Plus.

Statements being made in the labeling of AHCC® Plus

- 1) AHCC® Plus combines AHCC®, a proprietary compound researched extensively for its immune enhancement properties, with three powerful immune and cellular defense nutrients - selenium, tocotrienols and *gamma* vitamin E.
- 2) According to human and animal research, AHCC may significantly increase Natural Killer (NK) Cell activity, macrophage activity, enhance cytokine production, and support healthy liver function, as well as act as an antioxidant
- 3) Some scientific evidence suggests that consumption of selenium and antioxidant vitamins may reduce the risk of certain forms of cancer. However, the FDA has determined that this evidence is limited and not conclusive.

To the best of my knowledge and belief, and based upon information available at the time of the execution of this notice, I certify that the above information is accurate and complete. Source Naturals® possesses substantiation that the statements are truthful and not misleading.

Ira L. Goldberg  
President, Source Naturals®
